Spenco® Total Support Sandals combine the support and stability of our best-selling replacement insole with the comfort and simplicity of a slip-on sandal. Great for after sports or training or just kicking back indoors or out. Unlike some other slip-on sandals, Spenco® Sandals are designed with orthotic-quality arch and heel support. Superior impact cushioning and motion control help reduce pronation and supination—common problems associated with flat, slab-style sandals.

- **Total Support System**
  absorbs shock and helps prevent over pronation.
- **Orthotic Arch Support**
  and deep heel cupping promote stability, alignment and motion-control.
- **Comfortable soft strap**
  securely holds wearer’s feet to the total support footbed allowing maximum benefit from deep heel cupping and arch support.
- **EVA surface custom molds**
  over time to conform to the unique shape of the wearer’s feet.
- **Metatarsal Arch Support**
  offloads pressure from the ball of foot to help relieve forefoot pain.
- **NEW non-marking rubber outsole**
  provides gripping and stable support.

Yumi spring 2012
The only sandal with Spenco® support and comfort built right in.
